STANDARD BI-FOLD CROSS SECTION

Touchstone Bi-Fold and Hinged Doors provide uninterrupted views and wide open access points, perfect for enhancing your home, shop or café entertainment areas.

Available in a number of configurations, including service leaf, 'slide and stack' and internal stacking, they allow you to select the opening to suit your needs. Each door is top-hung with a precision ball bearing guide system so the door operates smoothly. The lever handle provides multi-point locking – a single action releases both the top and bottom bolts.

Touchstone Bi-Fold Doors feature continuous weatherproof seals around the perimeter of the door that also assist with sound control. You don't need to worry about exposed positioning or high winds because the profile of this door is extremely robust. The bi-fold or hinged glass door comes with the option of an internally fitted retractable flyscreen that won't affect your view. Of course, Touchstone Bi-Fold Doors come with Double Glazing Australasia's seven year guarantee for your peace of mind.
