TOUCHSTONE KEY FEATURES

- Double Glazed;
- Windows can be used internally and externally;
- Operable window configurations available;
- Custom frame options available.

Touchstone Sliding Windows are precision designed to be unobtrusive but offer high performance in your new or renovated home.

They offer outstanding thermal and acoustic protection, and a number of weather resistant features provide comfort and extra protection from rain and wind. They also feature a continuous weather seal strip and sill inlay to assist with drainage.

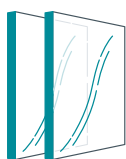

Touchstone Sliding Windows feature a pivot action self-latching handle conveniently located at the divider (mullion). The height-adjustable, stainless steel ball bearing roller system ensures continual smooth opening and closing actions and excellent durability. A sill inlay helps restrict the accumulation of dust, water and other matter in the sill cavity.

Touchstone Sliding Windows are a precision fit in your new or existing home with hidden top and bottom rails for a clean, seamless look. Available in a variety of configurations, including 90° corner windows. Choose from a range of colours to suit your home's colour scheme. Of course, Touchstone Sliding Windows come with Double Glazing Australasia's seven year guarantee for your peace of mind.

Other products available in the Touchstone range:

Sliding Doors, Awning Windows, Bi-Fold Doors and Windows and Hinged Doors.
